Prof. Hugh Watkins – Lead investigator, CureHeart
Prof. Christine Seidman – Co-lead investigator, CureHeart

STUDY PARTICIPANTS NEEDED

Are you affected by cardiomyopathy?

CureHeart is developing **genetic therapies** to treat inherited cardiomyopathy.

<https://cureheart.org/patients>

The **CureHeart: Patient Perspectives study** is a vital part of this project and aims to understand how cardiomyopathy impacts peoples' lives, and what people think about current and future treatments. [Ethics Reference: R89137/RE001]

We are looking for people who:

- have cardiomyopathy (any type), or have a relative with cardiomyopathy
- are aged 16 or over

Please scan the QR code or visit web link to complete a short online questionnaire (5-10 minutes).
